URBN sales for the first quarter increased by $13 \%$ to a record $\$ 1.05$ billion. The increase in sales was due to a $12 \%$ increase in Retail segment sales and a $6 \%$ increase in Wholesale segment sales. Retail segment sales comp increased $11 \%$. The relative proportion of Retail segment sales attributable to store and digital channels changed significantly due in large part to the temporary store closures and occupancy restrictions in the United States, Europe and Canada in the prior year quarter due to the COVID-19 pandemic. Nuuly segment sales for the first quarter increased by $\$ 15$ million.

Gross profit dollars increased by $8 \%$ to $\$ 323$ million for the quarter, while gross profit rate decreased 169 bps to $30.7 \%$. The decrease in gross profit rate was primarily due to lower initial merchandise markups driven largely by higher inbound transportation expenses and raw materials costs.

Selling general \& administrative ('SG\&A') expenses increased by $22 \%$ to $\$ 277$ million while SG\&A as a \% of sales deleveraged by 184 bps to $26.3 \%$. The deleverage in SG\&A as a rate to sales and growth in SG\&A dollars was primarily related to the increased penetration of retail store sales in the current year quarter as we incurred store payroll expenses to support the retail store sales growth.

Operating income dollars decreased by $37 \%$ to $\$ 46$ million while operating income rate decreased by 353 bps to $4.4 \%$. The decrease in dollars was primarily due to the increase in SG\&A expenses to support the increase in retail store sales. The decrease in rate was primarily due to the lower gross profit rate and deleverage in $\mathrm{SG} \& A$ expenses in the quarter.

Net income for the quarter was $\$ 32$ million or $\$ 0.33$ per diluted share.

Total Company or URBN sales for the first quarter increased by $13 \%$ to a record $\$ 1.05$ billion. URBN Retail segment sales increased $12 \%$ to $\$ 963$ million, with comparable sales increasing $11 \%$. The relative proportion of Retail segment sales attributable to store and digital channels changed significantly due in large part to the temporary store closures and occupancy restrictions in the United States, Europe and Canada in the prior year quarter due to the COVID-19 pandemic. With those restrictions not present in the current year quarter, Retail segment comparable sales increased due to doubledigit growth in retail store sales due to higher traffic and transactions as well as an increase in average unit retail, partially offset by a decrease in units per transaction and conversion rate. Higher retail store sales were partially offset by mid-single-digit negative digital channel sales due to decreases in sessions, units per transaction and conversion rate, which was only partially offset by an increase in average order value.

URBN Wholesale segment sales for the first quarter increased by $6 \%$ to $\$ 66$ million, driven by a $9 \%$, or $\$ 5$ million, increase in Free People Group wholesale sales.

Nuuly segment sales for the first quarter increased by $\$ 15$ million driven by a significant increase in our subscriber base.
